## TEACHER FEATURE

Vanessa Fravel's Marine Biology classes conducted a lab comparing and contrasting three different species of live Holoplankton. One of the species that the class was analyzing was actually the species that the character Plankton, from Sponge Bob, is based off. This little guy is known as a Copepod. Students were instructed to draw out what they saw in their microscopes and decide what kind of plankton it was—a Phytoplankton or a Zooplankton.

## MEET THE TEACH

Lacey Babcock, seen with her husband, is CCHS's new Biology and Exercise Science teacher. She is originally from Panaca, Nevada. She moved to Utah in 2012 to attend BYU, majoring in Athletic Training. Afterwards, Mrs. Babcock earned her Master's in Public Administration Management from UNC Chapel Hill with a concentration in international relations. Something her students may not know about her is that Mrs. Babcock just got married this summer! Why did Mrs. Babcock become an educator? Both of her parents are educators, and she has always had a deep love and passion for learning. When asked what the best part of being a Charger has been thus far, Mrs. Babcock happily answered, "The best part of CCHS is the people. I love interacting with other teachers and feel very supported by the admin. The students are awesome, incredibly wonderful!"

Corner Canyons EEC class went on a field trip to Scheels for a jobs tour. Scheels partners with Canyons School District's Special Education Post High Program and hires people with disabilities. The students were thrilled to see the job skills that they practice at school put to life at everyone's favorite sporting goods store. They explored all the departments, got a little history lesson, saw behind the scenes in the warehouse, sampled some fudge, learned about the aquarium, and even rode the Ferris Wheel! Fun was had for all!
